

# Math-Related Activities for Children!

- Hopscotch practices coordination and counting with children!

- You can get creative with Hopscotch and do shapes! Call out shapes and have your child jump on them.

- With outdoors, time races through running or bicycles! Timing your child during races can teach them the concept of time.

bicycles! Timing your child during races can teach them the concept of time.

- Indoor Bean Bag Toss – Using masking tape create numbers or shapes on your hard floors. Then with bean bags or stuffed animals have your child throw an object to the items you call out!
